Introduction

- **Self-perception** is an individual's personal view of themselves.
- **Gifted** individuals seem to have a **more positive** self-perception.
- Previous research shows **inconclusive** results.
- **No** research has been done on the self-perception of **gifted Malaysians**.

Objectives

To study the effects of **gender** and **giftedness** on self-perception.

Discussions

- **Non-gifted** individuals generally have **higher** levels of self-perception than gifted individuals.
- **Gifted** individuals showed significantly higher perceptions of **IQ, intelligence, language skills and musical abilities**.
- **Non-gifted** individuals showed higher perceptions of **science** proficiency and **happiness**.
- **No significant gender** difference in self-perception was observed.

Conclusions

- **Non-gifted** individuals have **higher** levels of self-perception than their gifted counterparts.
- Gender did **not** have a **significant** effect in most areas.
- The result **contradict** previous research.

Methodology

- A survey was conducted containing **40 items** under **Intellectual Abilities, Physical Abilities, Emotional/Social Intelligence, Personal Traits** and **Abstract Aspects**.
- For each item, respondents were required to **rate themselves** (based on their own self-perception) in terms of that aspect.

Table 1. Sample Demographics

	Gifted	Non-Gifted	Total
Male	68	52	120
Female	77	121	198
Total	145	173	318

- Sample consists of **Malaysians** aged **above 13**.
- Data was analysed using **SPSS Version 29**.
- **Descriptive statistics** and **independent t-tests** were used to investigate the relationship between self-perception, gender and giftedness.
- Analysis utilised a **95% level of confidence ($\alpha = 0.05$)**.

Results

Table 2. Overall Mean for Giftedness and Gender

	Giftedness	Mean	Sig.	Gender	Mean	Sig.
Overall Mean	Gifted	4.44	0.010	Male	4.49	0.843
	Non-Gifted	4.60		Female	4.55
